Subway Surfers is a single player mobile gaming app and website developed by Kiloo. The aim of the game is to outrun a train inspector while dodging oncoming trains, barriers and other objects. Collecting coins on the way gives players advantages such as hover boards and high scores.

The object of the game is to run as far as possible in a endless game world while avoiding randomly generated obstacles that require the player to either jump (slide finger forward), duck (slide finger backwards) and dodge the oncoming trains in a precise manner.

Subway Surfers is an endless runner video game developed & published by Kiloo & SYBO. The player takes on the role of an average teen (or, on rare occasions, a young adult) vandalizing a subway train, and is caught by The Inspector and his dog. The player must run away from the two, who are chasing him/her. In the Sydney Logo.png Update, they added keys which revive the character if they should choose to use them. The game is available on iOS and Android platforms.
